

Guard Instructions for Use

PetChatz.com

The PetChatz® Guard is placed on the wall or kennel fence, behind the PetChatz mounting bracket. We recommend aligning the guide pins on the Guard base with the mounting bracket for accurate placement and installation of the PetChatz Guard.

The PetChatz Guard is designed to be pet proof with a latch-locking mechanism. To unlock the PetChatz Guard, hold the cover latch handle between your thumb and forefinger and pull straight to the right, away from the Guard cover. To lock the cover to the base, press the cover latch handle with your thumb until you hear a click and confirm the latch mechanism is secure.

Bracket Type: Large Outlet Opening
